The commercial version of that is where I got the idea for my directional steady rest that I showed a year or so ago.

Alrighty. I'm gonna hop out. Looking forward to catching more meetings in the future

18:22:45 From Brent Sobotka, Buffalo, WY:

I would be interested in STL files for a 3-D printer.

18:22:53 From Tom Kenny - Tallahassee, FL to Dave Rhodes(direct message):

That would be helpful.

18:23:19 From Gerald Jensen:

I would be interested in either Lightburn or SVG

18:23:53 From Brent Sobotka, Buffalo, WY:

I've got several STL files that I've made that I would contribute.

It's the basic files for whatever you make on a 3-D printer. Stands for Stereolithography

Most decent image programs will easily convert between STL, SVG, and GCode formats.... if we have them in several different formats, it means that we can download whatever format we need for whatever device we want to use.

I make stuff in Sketchup. There is an STL converter extension available for Sketchup that converts from .skp to STL.
