So many people don't want to color wood with grain like this piece has. As we can all plainly see, the dye REALLY brings out the grain. This will only get even better when the finish is applied.

Thought I'd share what I'm doing right now. I'm in Santa Monica with my friend Cliff Witt. He has a small engine repair and maintenance shop in a trailer and helps out when there is a large fire. We hauled it down late last night. We keep the chainsaws sharp and running, along with fixing small gas engines like generators and pumps for Cal-Fire. They stationed us out of harms way in a staging area about five miles from the Palisades fire. With everything portable we can leave in a hurry if need be. The winds have calmed to about half of what they were last night. Unfortunately they're suppose to pick up again around 4-5 am. Sorry that I don't have a camera or mic tonight, as I'm on my phone without wi-fi and only have a weak phone signal.
