Replying to "Beall still makes a ..."

Yep.... the 3/4" one for the tailstock live center thread....

18:43:55 From Brent Sobotka, Buffalo, WY:
I made some cutters similar to what Scott just made except with a negative rake, and with an angle set to the side in order to always be cutting on shear instead of scraping. They are kind of a pain because they are directional. I had to make right and left cutters. I tend to not use them.

18:45:01 From Billy B (Alamo City):
I've done that too, Brent. I cut the bed for the cutter at a slight angle to the left (as looking toward the headstock).

18:45:23 From SueB - Cape May, NJ:
hittin the hay. Thank you for sharing Scott. Very interesting demo! Cyall next week.

18:46:36 From no band aids Brenda...ohio:

that was awesome

18:48:56 From Brent Sobotka, Buffalo, WY:
Replying to "I made some cutters ..."

Exactly. Except I made four. Two with square cutters, two round, and each right and left.

18:51:51 From Brent Sobotka, Buffalo, WY:
Replying to "I made some cutters ..."

They need to be directional depending on whether you're on the inside or outside of the vessel. That's what makes them a pain. So I usually just use my Easywoods if I want to use carbides.

18:51:59 From Leonard Davis in Athol, MA:
