Ruby, Mud Dobbers are a species of wasp. They sting spiders and put them in a mud nest, then lay their eggs in it. The young feeds on the spiders until they can emerge.

17:32:06 From Tim Hatch Bastrop, TX:
Replying to "I was going to turn ..."

Wasp that pack their eggs in a mud cocoon with a little bug or spider in next to the egg to give the offspring something to eat... They like pipes and hollow places but will build wherever..
