Check your chuck tightness.... looked like it spun a little

18:20:22 From Roger Wollam Kahoka Mo:  
What speed you turning it looks slow

18:21:21 From Tim Hatch Bastrop, TX:  
Good rule of thumb I found out the hard way... if you get a catch... double check your tightness of the Chuck... Best case if it is a little loose is it will give you a new center and your original center will be off... Worse case is you will have the piece come flying out... Not that that has ever happened to me...LOL
