The Art of Makin' Shavings

FEBRUARY 11, 2026 VOLUME 3 NUMBER 3

Victor Todd

Bob Grinstead

John Koscinski

Gerard Dubois

Jay Giuliani

Jayson Cote

Top right: Square platter out of sapele. **Clockwise from left:** Walnut inside-out marble ornament; A trio of segmented plywood birdhouses; Mystery branch bowl; FOG wood winged vessel; Spalted beech floating wooden spoon holder.

Jeff Walters

Jon Moore

Ron Pollman

Dave Kingsley

Colin Spencer

Top: Jeff Walters demonstrated his process for making a pen from start to finish during our club meeting January 28th. You can view the entire meeting or just Jeff's excellent demonstration by visiting our YouTube channel, **@worldwidewoodturners1**. World Wide Woodturners meet via Zoom every week at 7:00 PM Eastern. Go to worldwidewoodturners.org and click "go to meeting."

Billy Burt

Brenda Thornton

Ray Schwartz

Facing page, left side: Walnut vase with glass tube. **Center:** Maple leaf bowl (made of maple). **Bottom left to right:** Maple vase; Beech box with a purpleheart lid and greenheart finial. Embellished using a rose engine lathe. **This page, top:** large urn - African mahogany, white ash and red oak with a flame Boxelder inlay in the lid; keepsake urns - African mahogany, white ash, walnut, purpleheart and mesquite. **Left:** Ash box. **Right:** Ash and walnut business card holders.

Digital Stop For Segmenting

By Jeff Walters

One of my struggles with segmenting is cutting the segments and getting it to the right length so that I get the proper circumference. It took a bit of fumbling with calipers, measuring between the teeth of the saw blade and the stop, then using a piece of scrap wood and cutting the test segment and measuring it to see if I had it right. Sometimes it took a few tries to get it right. So I needed a better way to measure. I have seen people online make digital stops that they either didn't sell or they were outside of my budget. So I did a little research and came across a 6" Digital Readout from Taylor Toolworks for \$35.00. It fit the bill perfectly.

I modified my existing stop to accommodate the read out and custom made a bracket to connect the stop to the readout. It was a relatively simple. The trickiest part was manufacturing the bracket. I used an old aluminum bracket from a window blind and using an angle grinder with a cutting wheel, I cut it down to the width I needed. Then I carefully measured the mounting holes under the read out and transferred those measurements to the bracket and drilled. After attaching to it the readout, I mounted the read out to the sled. Using the stop, I marked the bracket and cut it off so it was flush with the stop of the stop. Drilled a couple of holes and mounted the stop to the bracket.

If you look at the picture below you will see the completed sled. With a plywood miter bar attached to the bottom so the sled sat flush with the body of the saw blade, I was able to run it through the saw making it flush with the teeth of the saw blade. The segmenting sled on the left with the digital sled on the right. All I need to do is set the readout to the decimal measurement I am using and run my stock through the saw making the number of segments I need for that particular ring.

Level-up

•3 Full Days of Demonstrations
•4 Complete Turning Pods

Instructors

Dean Grimes	Jeff Walters
Kade Bolger	Brent Sobotka
Billy Burt	Roger Wollam
Tim Hatch	Dan Smith
Paul Hannaby	Dave Rhodes
Martin Clarkson	Sue Jilek
Gary Hales	Jim Duxbury
Matt Harber	Rita Duxury
Joaquin Juatai	

September 17-20 2026
Wisconsin Rapids Wisconsin

Tuition Cost \$160

Includes all training &
Evening Meal
Hotel Accomodations are now available.
